Susan Hall, PT considers herself a detective and everyday looks forward to investigating and uncovering the best options to treat her patients. If one technique falls short, she explores the next option until her patient sees results.

Sue earned her bachelor's degree in 1982 at Oakland University. In addition to the typical PT classes, she has also learned from several physical therapy pioneers like Vladimir Janda, Brian Mulligan, Florence Kendall and Fred Mitchell Jr. and his son. She began her career at Hurley Medical Center and was hired at Advanced Physical Therapy Center in 1995 where she has become a highly respected member of the team.

Sue believes her experience sets her apart. All tolled she confident she's seen nearly one thousand knee replacement patients and one thousand rotator cuff patients. She often serves as a mentor to some of the other therapists because of her vast knowledge and experience.

Sue is Graston Technique and LSVT-BIG certified. She also specializes in MedX Lumbar Testing and Treatment, Myofascial Release, Pregnancy and Post-Partum Therapy and TMJ Dysfunction.

Sue says, one of the best things about working at APTC, is the owners encourage the therapists to learn new treatments and techniques, and the clinics always have the newest, state of the art technology for the patients.

Sue volunteers for the Compassionate Life Foundation, an organization that provides full monetary support for the El Shaddai orphanage in the mountains near Manzini, in eSwatini, Africa. Sue has served on its Board of Directors and has traveled to Africa on missions. She even found a way to use her physical therapy training there, stating in a letter written during her latest trip, "I stretched our little guy with cerebral palsy and plan to teach his aunties how to stretch him also." She has also helped at a free health clinic for the community surrounding the orphanage.

Golfing is one of her passions and she loves any outdoor activity like biking and hiking. Sue is married and has a son, 2 step sons and 2 granddaughters. Sue lives in Clio and works out of Advanced Physical Therapy Center's Clio Clinic.
